LEVI KING

Type: ROUTINE INSPECTION  
Date: 19-OCT-2020

---

**3.25(a)** Repeat

**Facilities, general.**

Although the side walls of the enclosures measured approximately 7 inches in height, during the inspection, one guinea pig was observed to be out of the enclosure and running around on the floor of the building.

Guinea pigs that have escaped their enclosure could be at risk of injury or escape from the barn as well as the inability to access food and water.

The enclosure must contain the animals. The licensee must ensure that the enclosure contains the animals at all times and does not allow them to escape.

**3.31(b)**  
**Sanitation.**

There was a large amount of discarded bedding, hay, and debris on the floor under and around the guinea pig pens. The lack of sanitation and presence of debris may attract pests into the room, result in unpleasant odors, and may contribute to spread of disease.

The buildings used for housing animals must be kept clean and in good repair to protect the animals from injury and to facilitate prescribed husbandry practices and maintain the health of the animals.

Correct by: October 26, 2020

### 3.31(a)(1)

#### Sanitation.

Enclosure housing approximately 46 weaned guinea pigs has accumulations of feces and soiled bedding. Facility representative said the enclosures are cleaned at least weekly on Saturday, but this enclosure appears to have been missed this week.

Ineffective cleaning and sanitation can expose the animals to disease hazards and health problems. Primary enclosures must be cleaned often enough to prevent an accumulation of feces and soiled bedding, and must be sanitized at least once every 2 weeks. Correct by ensuring that all primary enclosures are kept clean to prevent an accumulation of excreta (feces), dirt, and soiled bedding and that enclosures are sanitized at least once every 2 weeks. Correct by October 19, 2020.

This inspection and exit interview were conducted with the facility representative.

### 2.75(b)(1)

#### Records: Dealers and exhibitors.

Records of animal births and deaths were not available except for the September and October since the previous inspection. Records are required in order to adequately verify the total number of animals housed at the facility and for evaluating the facility animal care program. Correct by ensuring there are current records for animal totals, including births and deaths, maintained and available for review for the guinea pigs housed at the facility. Correct by October 31, 2020.

This inspection and exit interview were conducted with the licensee.

Type: ROUTINE INSPECTION  
Date: 04-NOV-2020

---

**3.28(c)(1)(iii) Repeat**

**Primary enclosures.**

Space. Insufficient space was being provided in 13 enclosures housing 15 guinea pig weanlings in each enclosure. Enclosures measure 30 inches by 28.5 inches or 855 square inches. The food bowl (6.25 inches in diameter) took up an additional 30.66 square inches of floor space leaving a total of 824.34 square inches. Weanlings up to 350 grams require at least 60 square inches of floor space each.

Inadequate space can cause stress, crowding, and aggression in animals. Licensee must ensure that guinea pigs are provided with at least the minimum space requirements to prevent stress, crowding, and discomfort to the animals. Can not house more than 13 guinea pig weanlings in the current enclosures.

This inspection and exit interview were conducted with the licensee.
