Type: ROUTINE INSPECTION  
Date: 11-MAR-2020

---

### 3.1(c)(1)(ii)

#### HOUSING FACILITIES, GENERAL.

In the travel trailer that houses the dogs' crates, there is an approximately 1ft by 1ft jagged hole where the AC unit was torn away. The licensee states the AC unit was removed by the dogs this past weekend. During inspection, they had free access to the exposed jagged metal edges and were seen poking their heads through the hole. Licensees must maintain housing facilities so that they are structurally sound, protect the animals from injury and restrict other animals from entering. The exposed metal edges may cause serious injury to the dogs, and the hole in the trailer wall allows access to unwanted animals.

Correct by 13 March 2020.

### 3.125(a)

#### FACILITIES, GENERAL.

A primary enclosure's fence that a llama has access to is in disrepair. Most notably, there is a 1.5ft by 1ft section at the bottom where the fence wire allows for animals to pass through. The edges of the fence wire are exposed towards the inside of the pasture.

Licensees must maintain housing facilities so that they are structurally sound, protect the animals from injury and restrict other animals from entering. Exposed fence wiring may cause the animals injury and allow unimpeded access to unwanted animals.

Correct by 18 March 2020.

This inspection and exit interview were conducted with

#### Additional Inspectors

Napoli Kristin, Supervisory Animal Care Specialist
