Translational Testing And Training Laboratories  
387 Technology Circle Suite 175  
Atlanta, GA 30313

Customer ID: **38366**

Certificate: **57-R-0122**

Site: 002

T3 LABS

Type: ROUTINE INSPECTION

Date: 13-JUL-2017

---

### 2.31(e)(3) CRITICAL

#### INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

\*\*\*During a surgical procedure performed for Protocol HN01P (non-survival), procedures were performed that were not originally included in the protocol. The protocol was approved for minor surgical procedures and additional tissue harvest post euthanasia but the PI deviated from the approved procedures and entered the abdominal cavity to harvest additional tissues before the pig was euthanized. When the Veterinary Technician saw the PI opening the abdominal cavity she immediately notified the Veterinarian. The procedure was stopped and the pig was euthanized. The event was investigated and the corrective actions implemented are appropriate.

Corrected

### 2.33(b)(3)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

\*\*\*The room care sheet for the rabbit room164 on July 11, 2017 does not have any entries to indicate that the daily observations and care were completed on that day. The observations were noted for the 10th and 12th but no entries made for the 11th. Documentation of observations shall be completed and communicated in a timely manner to insure all animals have been observed and the daily tasks completed.

Corrected by end of inspection.

This inspection and exit interview were conducted with the Attending Veterinarian, the Director of Pre Clinical Quality Assurance and the QA Specialist.
