Site: 001  
ANIMAL HAVEN FARM-ZOO

Type: ROUTINE INSPECTION  
Date: 25-FEB-2014

#### 2.40(b)(2) DIRECT

##### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

An approximately one year old male lion appears to be in an abnormal condition. It was observed in the corner of its enclosure unwilling to walk with visible twitching of the head and face. It also showed signs of irregular eye and tongue movement. Licensee stated that the animal was examined by the attending veterinarian in the fall of 2013 and the lion is currently under treatment. However, the lion appears to not be responding to the present treatment by showing signs of the abnormalities stated above.

Abnormal conditions require regular evaluation by the attending veterinarian to ensure the health, well-being, and comfort of the animal.

The animal needs to be reevaluated by the attending veterinarian.

Correct By: February 28, 2014

#### 3.81

##### ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

Licensee currently has an environmental enrichment plan specific by species of primate however, there is no plan for the ringtail lemurs.

Not having a documented and approved environmental enrichment plan for the lemurs does not ensure that the psychological needs of the ringtailed lemurs are being met.

An environmental enrichment plan for the ringtailed lemurs must be developed and approved by the facility's attending veterinarian.

Correct By: March 18, 2014
