| Offense Description S65W WILDLIFE EXHIBITS | | | | |

On 2/11/2021 at approximately 1000 hours, I, Investigator Theodore Mandrick, of the Florida Fish and Wildlife Conservation Commission, along with Investigator Ken Holmes and Biologist Janelle Musser, conducted a routine ESB and ESC inspection at “Single Vision” in Clay County, FL. The facility is located at 8185 Forest Hills Rd. in Melrose, 32666. The licensee, Carl Bovard (ESB App ID:14526), accompanied us for the inspection.

During the inspection, the following was found:

- Several of the tiger and kinkajou enclosures had excessive amounts of feces and food waste present and needed to be cleaned more frequently.
- A kinkajou was observed in an enclosure that did not meet the required size dimensions. Mr. Bovard stated that it was only being temporarily kept in the enclosure but did not have documentation of the date when it was placed in the smaller enclosure. He was instructed to document the date for future temporary caging of animals to ensure that animals are not kept in small enclosures for over 60 days.
- U-nails/staples on several enclosures, particularly the kinkajous and white lions, needed to be resecured.
- Rusty caging material on the lemur enclosure needed to be replaced.
- Following Mr. Bovard’s last inspection a pool was added to his tortoise enclosure, however, it was too small and needs to be

| | | | | |

| Offense Description S65W WILDLIFE EXHIBITS | | | | |

replaced with a pool that is double the length and width of the tortoise's shell.

- The porcupine enclosure either needs a top added or a caging deviation requested for an open top enclosure.
- The tree near the side of the tiger enclosure needs a climb barrier added to prevent a possible escape risk.
- Mr. Bovard was instructed to keep a running record of all animal births and deaths at the facility.
- Mr. Bovard could not provide acquisition records for 2 American alligators that are less than 4 feet in length.
- Mr. Bovard had 2 juvenile hybrid bears in an enclosure on the back porch of his residence and a juvenile hyena living inside his residence that need to be moved to enclosures that meet their respective species caging requirements. He was instructed that this should have been done when their weight exceeded 25 lbs.
- The pools for the hybrid bear enclosures needed to be larger to meet the requirements for brown bears. Mr. Bovard was instructed to obtain or build pools that meet requirements for brown bears when designing enclosures for his hybrid bears because they are the higher regulated animal with the hybrid's genetic cross. Mr. Bovard was instructed to request a caging deviation for the pool size if he believed his hybrid bears were more similar to black bears than brown bears.
- Mr. Bovard was allowing all of his animals access to their exercise yards simultaneously during the inspection, some of which were on opposite sides of his property and could not all be

supervised at the same time. Mr. Bovard was informed that when allowing any animals access to an exercise yard, they must be under direct supervision. He was further informed that if he cannot visually supervise any animal and quickly interact with it, they cannot be loose in exercise yards that do not meet caging requirements.

During this inspection, it was evident that Mr. Bovard had corrected or attempted to correct all of the violations that had been explained to him during his past most recent inspection from Investigator Barber. This was also my first time meeting Mr. Bovard and visiting his facility, which I will be inspecting on a semi-annual basis. Due to his past history of compliance with regulations and to establish rapport, Mr. Bovard was verbally warned on all of the issues with the understanding they needed to be corrected immediately.

The above was captured on our state issued body cameras.
