

Hello,

I am writing to urgently request that you take action to ban cruel wild horse helicopter roundups – where horses are chased into corrals by helicopters and are often injured or killed, and separated from their families in the process.

In July, nonprofit animal protection group Lady Freethinker sent an observer to the North Lander Complex roundup in Wyoming and documented wild horses terrorized by extremely low-flying choppers. 16 horses died in this roundup alone. According to the BLM's gather reports in the fiscal year of 2024, 131 wild horses and burros have perished during helicopter-facilitated roundups thus far.

Every year wild horses endure violent deaths in these gathers, including broken limbs, head trauma, and snapped necks. Please ensure no other horses have to suffer and die and ban deadly wild horse helicopter roundups immediately.

Thank you.
